The importance of the three months' of finesive is not to be judged by the distance advanced or the number of enemy trench lines taken. It must be looked for in the effect upon the enemy's strength in numbers, material and morale. The enemy has used up his reserves in repeated, costly and unsuccessful counter attacks without causing our allies or ourselves to relax our steady, methodical pressure. In this action troops from every part of the British Empire and British Islands have been engaged. All behaved with the discipline and resolution of veterans. Our aircraft have shown in the highest degree the spirit of the offensive. They have patrolled regularly far behind the enemy's lines and have fought many battles in the air with hostile machines and many with enemy troops on the ground. For every enemy machine that succeeds in crossing our front it is safe to say two hundred British machines cross the enemy's front. Saks Can Fit You With a Suit of Clothes

That Will Look Better on You Than Any Suit You Ever Had

¶ Several things combine to make a Saks Suit superior to average ready-for-service clothes, but the chief reason is that we make them ourselves.

¶ Most suits are made by out-of-town manufacturers for national distribution under many labels, and cut in units of ten fronts, ten backs, ten sleeves, and so on.

¶ Saks Suits are made by Saks right here in New York, and made one at a time-get that!-not cut in units of ten, but cut suit by suit, that their individuality shall be beyond question.

¶ You can't get style in ten-unit lots-you can't get individuality in bunches-but you can get style in Saks Suits because they are made by custom methods, and on custom lines, cut, tailored and finished one at a time, and benefiting in the process by all those creative touches which distinguish the Handiwork of Man from the Hurriwork of Machines!
